

Middlesex Amateur Radio Club

..... **W1HEB**

And speaking of help, - our 6 Meter Net could sure use some help. Any volunteers for Net Control Station? - Our 10 Meter Net could use some more check ins too. How's about it OM?

Net Control Station for Nov. 6, - K1QQF - 8:00 PM; 28.9MHz

QRZ Special Bulletin to all Techs and Generals: For the next few weeks, you'd better have a ball on those "Sub Allocation" bands because after Nov. 22 you'd better give them elbow room unless you've got one of those higher class licenses.

Club Standing on Field Day Observations For all of W-1 land, we came in second in points for Class A, two xmtrs. We knew we were good but not that good. Congrats to us! Next year First! Wot say group?

Have any of you been wondering what happened to W1AW? Well then, you just haven't been reading your QST. They've moved. You'll find them just 20KHz inside the lower end of each of the amateur bands from 160 meters to 2 meters.

Speaking of code practice, - it looks like our club has all systems go in this area. The turnout at the last two meetings has been terrific. If we keep it up we'll keep the FCC office in Boston busy handing out new licences. And while we're on the subject, it looks like we have a real "ham's Ham" in the club, - in fact we have a lot of them, - but this one has offered to help anyone who feels the need for some additional code practice, - just call him on the land line, - Neal Lipson K1NDF, 527-7731 and make arrangements. Many thanks to you Neal.

Anyone looking to buy, sell, swap equipment, components, books etc? Let your Corresponding Sec. know and we'll publish it in QRZ - - for free! Also on our free list are the drawings and coffee and donuts after the meetings. Did you ever stop to think of what a bargain you get for the four buck membership fee in MARC? We've never been able to figure out how we do it.

Just enough paper left to say 73s from your corresponding sec

WA1HLJ
